patriots on what it means to be an

Antherican and a whole new determi-nation for the patriots who live among us. Now, America's guard is up. We are vigilant and watchful and prepared for battle.

Although nothing will ever repair the losses we suffered on September 11, 2001, we can work together to ensure that America continues to be a beacon for freedom: I encourage you to take pride in America and re-member that we are fortunate to live in a country that is free. May God bless you and your families during this anniversary and may He look favorably upon our great nation as we continue to move forward.

As we reflect upon September 1th it is important that our nation comes together to memorialize those affected by the events of that tragic day. Many lives were lost, and the amount of pain suffreed can never be measured. We must never forget the victims, rescue workers and public safety officers who lost their lives as a result of the ierrorist acts on 'America'. We must never forget the pawer people who fought their hipschers over the fields of Pennsylvania and made the ultimate searfice to save the lives of Counters others. We must never the fields of Pennsylvania and made the ultimate searfice to save the lives of Counters others. We must never the fields of Pennsylvania of the property of the day America has proven again that she is the robest when challenged. In the wake of September 1 Ith I was hearned to see thousighds of Americans coming together the help those most affected by the terrorist attacks. Volunteers provided meals and comfort for the workers who tirtelessly searched the rubble at ground zero, the control of the workers who tirtelessly searched the rubble at ground zero. Men and women from all walks of like joined hands it unity and prayed for each other. Children donated their dollars to help boys and girls in a country that was half a world away. September 11th marks a turning joint in our history. No longer immune from the rest of the world's troubles, we now spend time looking around for danger. Our new real-intended their dollars to help boys and girls in a country that was half a world away. September 11th marks a turning joint in our history. "Mink"

(Cont from front)

Vehicles belonging to Gary Mink, Gamer Mink, Robert Hornsby, Jerry Mullins and Jack Rowe, all of Mt. Vernon, were burned to varying de-grees after Mink allegedly poured the accelerants on the driver's side seat, and ignited them. Mink was observed in the area, stopped and lighter fluid and W-D 40 was found in his pos-session.

Also, Delaney testified to finding a footprint that matched the shoes worn by the defendant, Rocky Mink. Over Rockcastle County Attorney

Over Rockeastle County Attorney
Jeff Burdett's objections, the court
reduced Mink's bond from \$250,000
ash to \$100,000 fully secured bond.
Burdette argued that considering the
seriousness of the class B felonies
which carry 10 to 20 years in prison
each, that Mink posed a threat to
the
community if released. The court indicated that the bond seemed excessive, and that the \$100,000 dollars
would be sufficient.
Mink remains in jail at this time.

Lake.

The dam that will impound the lake was created when the new road was built. Rather than bridge Cedar Creek, the dam was built and the potential for fishing tourism created. With normal rainfall this winter

tential for fishing tourism created. With normal rainfall this winter and next spring, it is expected the lake will fill in about a year. When the water starts to rise, which will come after the less desirable fish in the creek and ponds that will be inundated are killed, the state will stock sport fish. The less desirable risps include carp, bullbead, caffish and the state will stock sport fish. The less desirable ryps include carp, bullbead, caffish and 15,000 five inhel and wildlife Resources plans to stock 2,500 10-inch and 15,000 five inch largemouth bass; 20,000 black crappie; 180,000 one-inch theughi; 12,000 one-inch redear sunfish and 8,000 nine-inch and 2,000 one-inch channel caffish. Between the state wildlife agency which owns the lake property, and the local Cedar Creek Sportsmen's Club, which owns the lake property, and the local Cedar Creek Sportsmen's Club, spawning habitats have been built into the lake bed. That is expected to help the stocked fish multiply rapidly and create a high quality fishing lake. Lake will be the second largest lake in the state-owned lake shelind lake Malone near

ond largest lake in the state-owned lake behind Lake Malone near Russellville. The Lincoln County

Russellville. The Lincoln County lake will have 21 miles of shoreline and extend 3.6 miles from the dam upstream toward Ottenheim.

The lake will have a maximum depth of 60 feet and an average depth of 22 feet.

The state has been surveying the portion of the new 150 in Rockcastle County, but has not started buying right-of-ways.

Kentucky solar buildings showcased

Do you want to learn more about lar energy? The best way to undersolar energy? The best way to under-stand solar energy is to see homes and buildings that use energy from the sun for power. Watch the electric meter on an effice building nut back-wards as the solar panels on the roof generate electricity, feet the warmth in a solar-heated room, compare your electric and heating bills to those of solar energy buildings. You can find out what it is like to generate your own electricity and to have the op-own electricity and to have the op-tomic participation of the properties of the properties of the properties of the pro-lication rather than one determined by the placement of nearby power lines. On October 5, solar homes and

On October 5, solar homes and On October 5, solar homes and buildings across the U.S. will open their doors to the Seventh Annual American Solar Energy Society (ASES) National Tour of Solar Buildings. The public is invited to experience first-hand the various solar features of homes and other buildings. This year, in Kentucky, two homes and an office building will be show-cased in Rockcastle County. The

and an office building will be show-cased in Rockeastle County. The homes are owner-built with very unique appearances and attributes. The Livingston home is passive so-hard the properties of the properties. The Disputanta home is a round geodesic dome with a cupla and wrap-around porch. The electri-ity for both homes is produced with solar electric panels. The office of Appalachia - Science in the Public Interest (ASPI), a nonprofit group in Mt. Vernon, has a net metered sys-tem with 20 solar panels that cut the electric bill in half. When a fet me-tered solar system is producing more energy than the building is using, the electric meter on the building sings backwards. ASPI also uses a solar electric car for daily errands. Take the Kentucky Solar Build-ing Tour and explore the ways people are using energy that is less damag-ing to the environment than conven-tional methods of generating electri-ity and heat.

ity and heat.

For more information and directions, please contact ASPI by calling (606)256-0077. We look forward to
